Theorems

Bogoliubov transformation

Bogoliubov transformation of thermo field theory $a \longrightarrow \cosh(\alpha)\, a - \sinh(\alpha)\, \tilde{a}^+$, $\tilde{a} \longrightarrow \cosh(\alpha)\, \tilde{a} - \sinh(\alpha)\, a^+$, where a is the creation operator and $\tilde{a}$ is its tilde version, leaves the free Hamiltonian invariant.

History

V. Riccati (1757); D. Foncenex (1759); J.H. Lambert (1768).

The function sinh is encountered often in mathematics and the natural sciences.
